Vol. 60

Index/Contents

2010

Subject Index

Abatement

An Assessment of Costs and Benefits Associated with Mercury Emission Reductions from Major Anthropogenic Sources, 302

Absorbent

Technical Description of Parameters Influencing the pH Value of Suspension Absorbent Used in Flue Gas Desulfurization Systems, 1009

Absorption

Carbon Dioxide Removal from Flue Gases by Absorption/Desorption in Aqueous Diethanolamine Solutions, 925

Acclimation

Preliminary Acclimation Strategies for Successful Startup in Conventional Biofilters, 959

Accuracy Assessments

Developing a High-Resolution Vehicular Emission Inventory by Integrating an Emission Model and a Traffic Model: Part 1—Modeling Fuel Consumption and Emissions Based on Speed and Vehicle-Specific Power, 1463

Performance Evaluation of an In Situ Nitrous Acid Measurement System and Continuous Measurement of Nitrous Acid in an Indoor Environment, 1434

Acid Deposition

The Effect of Emission from Coal Combustion in Nonindustrial Sources on Deposition of Sulfur and Oxidized Nitrogen in Poland, 856

Activated Carbon

Adsorption of Chlorine Dioxide Gas on Activated Carbons, 898

Adsorption

Adsorption of Chlorine Dioxide Gas on Activated Carbons, 898

Copper Loaded on Sol-Gel-Derived Alumina Adsorbents for Phosphine Removal, 629

Revisiting a Population-Dynamic Model of Air Pollution and Daily Mortality of the Elderly in Philadelphia, 611

Aerosol Mass Spectrometry

Evolution of Vehicle Exhaust Particles in the Atmosphere, 1192

Aerosol Optical Depth (AOD)

An Improved Method for Estimating Surface Fine Particle Concentrations Using Seasonally Adjusted Satellite Aerosol Optical Depth, 574

Aerosol Variability

Spatiotemporal Variability of Light-Absorbing Carbon Concentration in a Residential Area Impacted by Woodsmoke, 356

Aerosolization

Development of the Releasable Asbestos Field Sampler, 294

Aerosols

Aerosols Emitted in Underground Mine Air by Diesel Engine Fueled with Biodiesel, 237

Environmental and Human Health Risks of Aerosolized Silver Nanoparticles, 770

Fine and Ultrafine Emission Dynamics from a Ferrous Foundry Cupola Furnace, 556

Fine Particulate Matter Source Apportionment Following a Large Woodstove Changeout Program in Libby, Montana, 688

Harmonization of Uncertainties of X-Ray Fluorescence Data for $PM_{2.5}$ Air Filter Analysis, 184

In-Vehicle Exposures to Particulate Matter and Black Carbon, 130

Study of the Properties of Aerosols and the Air Quality Index Using a Backscatter Lidar System and Aeronet Sunphotometer in the City of São Paulo, Brazil, 386

The Effect of Ozone on the Removal Effectiveness of Photocatalysis on Indoor Gaseous Biogenic Volatile Organic Compounds, 820

The Potential of a Partial-Flow Constant Dilution Ratio Sampling System as a Candidate for Vehicle Exhaust Aerosol Measurements, 1223

Theoretical versus Observed Gas-Particle Partitioning of Carbonyl Emissions from Motor Vehicles, 1237

Updating the Conceptual Model for Fine Particle Mass Emissions from Combustion Systems, 1204

Aftertreatment

An Analysis of Field-Aged Diesel Particulate Filter Performance: Particle Emissions before, during, and after Regeneration, 968

Agricultural Emissions

The Environmental Cost of Reducing Agricultural Fine Particulate Matter Emissions, 681

Agriculture

Ammonia Emissions from a U.S. Broiler House—Comparison of Concurrent Measurements Using Three Different Technologies, 939

Assessment of Long-Term Gas Sampling Design at Two Commercial Manure-Belt Layer Barns, 702

Atmospheric Ammonia Mixing Ratios at an Open-Air Cattle Feeding Facility, 210

Farm-Scale Evaluation of Ozonation for Mitigating Ammonia Concentrations in Broiler Houses, 789

Agriculture Pollution

Assessment of Long-Term Gas Sampling Design at Two Commercial Manure-Belt Layer Barns, 702

Air Pollution

A Two-Time-Period Comparison of the Effects of Ambient Air Pollution on Outpatient Visits for Acute Respiratory Illnesses, 163

Chemical Characterization and Preliminary Source Contribution of Fine Particulate Matter in the Mexicali/Imperial Valley Border Area, 258

Developing a High-Resolution Vehicular Emission Inventory by Integrating an Emission Model and a Traffic Model: Part 2—A Case Study in Beijing, 1471

Evaluation of Regional-Scale Receptor Modeling, 26

Evaluation of Relative Response Factor Methodology for Demonstrating Attainment of Ozone in Houston, Texas, 838

Marine Vessels as Substitutes for Heavy-Duty Trucks in Great Lakes Freight Transportation, 884

Mutagenicity of Airborne Particulates Assessed by *Salmonella* Assay and the SOS Chromotest in Wroclaw Poland, 993

Potential Air Emission Impacts of Cellulosic Ethanol Production at Seven Demonstration Refineries in the United States, 1118

Satellite Remote Sensing of Particulate Matter Air Quality: The Cloud-Cover Problem, 596

Seasonal Pattern of the Acute Mortality Effects of Air Pollution, 481

Seasonal Variation of Polycyclic Aromatic Hydrocarbon Exposure Levels in Mexico City, 548

Study of the Properties of Aerosols and the Air Quality Index Using a Backscatter Lidar System and Aeronet Sunphotometer in the City of São Paulo, Brazil, 386

The Environmental Cost of Reducing Agricultural Fine Particulate Matter Emissions, 681

Use of Passive Diffusion Tubes to Monitor Air Pollutants, 204

Air Quality

A Comparison of Statistical Techniques for Combining Modeled and Observed Concentrations to Create High-Resolution Ozone Air Quality Surfaces, 586

A Genetic-Algorithm-Aided Stochastic Optimization Model for Regional Air Quality Management under Uncertainty, 63

An Improved Method for Estimating Surface Fine Particle Concentrations Using Seasonally Adjusted Satellite Aerosol Optical Depth, 574

An Inexact Fuzzy-Chance-Constrained Air Quality Management Model, 805

Application of Nanoscale Silver-Doped Titanium Dioxide as Photocatalyst for Indoor Airborne Bacteria Control: A Feasibility Study in Medical Nursing Institutions, 337

Assessment of Long-Term Gas Sampling Design at Two Commercial Manure-Belt Layer Barns, 702

Cost Analysis of Impacts of Climate Change on Regional Air Quality, 195

Evaluation of Relative Response Factor Methodology for Demonstrating Attainment of Ozone in Houston, Texas, 838

Farm-Scale Evaluation of Ozonation for Mitigating Ammonia Concentrations in Broiler Houses, 789

Low-Wind/High Particulate Matter Episodes in the Calexico/Mexicali Region, 1476

Model for Estimation of Traffic Pollutant Levels in Northern Communities, 1335

Satellite Remote Sensing of Particulate Matter Air Quality: The Cloud-Cover Problem, 596

Seasonal Odor, Ammonia, Hydrogen Sulfide, and Carbon Dioxide Concentrations and Emissions from Swine Grower-Finisher Rooms, 471

The Influence of Model Resolution on Ozone in Industrial Volatile Organic Compound Plumes, 1105

Air Quality Control Equipment

Application of Nanoscale Silver-Doped Titanium Dioxide as Photocatalyst for Indoor Airborne Bacteria Control: A Feasibility Study in Medical Nursing Institutions, 337

Air Quality Indexing

Study of the Properties of Aerosols and the Air Quality Index Using a Backscatter Lidar System and Aeronet Sunphotometer in the City of São Paulo, Brazil, 386

Air Quality Management

Long-Term Wind Speed Variations for Three Midwestern U.S. Cities, 1057

Air Quality Simulation

Toward Effective Source Apportionment Using Positive Matrix Factorization: Experiments with Simulated $PM_{2.5}$ Data, 43

Air Quality Standards

A Re-Examination of Ambient Air Ozone Monitor Interferences, 1353

Air Quality Studies

Hourly Measurements of Fine Particulate Sulfate and Carbon Aerosols at the Harvard–U.S. Environmental Protection Agency Supersite in Boston, 1327

Air Toxics

A Site-Specific Screening Comparison of Modeled and Monitored Air Dispersion and Deposition for Perfluorooctanoate, 402

Copper Loaded on Sol-Gel-Derived Alumina Adsorbents for Phosphine Removal, 629

Revisiting a Population-Dynamic Model of Air Pollution and Daily Mortality of the Elderly in Philadelphia, 611

Spatial Variation in Ambient Air Toxics Concentrations and Health Risks between Industrial-Influenced, Urban, and Rural Sites, 271

Airborne

Environmental and Human Health Risks of Aerosolized Silver Nanoparticles, 770

Alternative

Potential Air Emission Impacts of Cellulosic Ethanol Production at Seven Demonstration Refineries in the United States, 1118

Alternative Solvent

Preliminary Study of Propyl Bromide Exposure among New Jersey Dry Cleaners as a Result of a Pending Ban on Perchloroethylene, 1049

Ambient Air Quality

A Two-Time-Period Comparison of the Effects of Ambient Air Pollution on Outpatient Visits for Acute Respiratory Illnesses, 163

The Environmental Cost of Reducing Agricultural Fine Particulate Matter Emissions, 681

Ambient Concentrations

A Comparison of Statistical Techniques for Combining Modeled and Observed Concentrations to Create High-Resolution Ozone Air Quality Surfaces, 586

A Re-Examination of Ambient Air Ozone Monitor Interferences, 1353

A Site-Specific Screening Comparison of Modeled and Monitored Air Dispersion and Deposition for Perfluorooctanoate, 402

A Two-Time-Period Comparison of the Effects of Ambient Air Pollution on Outpatient Visits for Acute Respiratory Illnesses, 163

Atmospheric Ammonia Mixing Ratios at an Open-Air Cattle Feeding Facility, 210

Characterization of Volatile Organic Compounds in the Vicinity of an Optoelectronics Industrial Park in Taiwan, 55

Chemical Characterization and Preliminary Source Contribution of Fine Particulate Matter in the Mexicali/Imperial Valley Border Area, 258

Relationship between $PM_{2.5}$ Collected at Residential Outdoor Locations and a Central Site, 1094

Results of a Long-Term Study of Vapor Intrusion at Four Large Buildings at the NASA Ames Research Center, 747

American College and University Presidents Climate Commitment (ACUPCC)

Greenhouse Gas Emissions from U.S. Institutions of Higher Education, 568

Amine Functional Groups

Adsorption of Carbon Dioxide from Gas Streams via Mesoporous Spherical-Silica Particles, 489

Ammonia (NH_3)

Assessment of Long-Term Gas Sampling Design at Two Commercial Manure-Belt Layer Barns, 702

Atmospheric Ammonia Mixing Ratios at an Open-Air Cattle Feeding Facility, 210

Experimental and Numerical Study on Effects of Airflow and Aqueous Ammonium Solution Temperature on Ammonia Mass Transfer Coefficient, 419

Farm-Scale Evaluation of Ozonation for Mitigating Ammonia Concentrations in Broiler Houses, 789

Analytical Methods

Buoyancy-Corrected Gravimetric Analysis of Lightly Loaded Filters, 1065

Hourly Measurements of Fine Particulate Sulfate and Carbon Aerosols at the Harvard–U.S. Environmental Protection Agency Supersite in Boston, 1327

Use of Passive Diffusion Tubes to Monitor Air Pollutants, 204

Animal House

Farm-Scale Evaluation of Ozonation for Mitigating Ammonia Concentrations in Broiler Houses, 789

Anthrax

Adsorption of Chlorine Dioxide Gas on Activated Carbons, 898

Asbestos

Development of the Releasable Asbestos Field Sampler, 294

Assessment

A Site-Specific Screening Comparison of Modeled and Monitored Air Dispersion and Deposition for Perfluorooctanoate, 402

Development of the Releasable Asbestos Field Sampler, 294

In-Vehicle Exposures to Particulate Matter and Black Carbon, 130

Results of a Long-Term Study of Vapor Intrusion at Four Large Buildings at the NASA Ames Research Center, 747

Atmospheric Chemistry

Updating the Conceptual Model for Fine Particle Mass Emissions from Combustion Systems, 1204

Automotive Exhaust

In-Vehicle Exposures to Particulate Matter and Black Carbon, 130

The Potential of a Partial-Flow Constant Dilution Ratio Sampling System as a Candidate for Vehicle Exhaust Aerosol Measurements, 1223

Theoretical versus Observed Gas-Particle Partitioning of Carbonyl Emissions from Motor Vehicles, 1237

Batch Biofiltration

Preliminary Acclimation Strategies for Successful Startup in Conventional Biofilters, 959

Benefits

An Assessment of Costs and Benefits Associated with Mercury Emission Reductions from Major Anthropogenic Sources, 302

Benzo[*a*]pyrene (BAP)

Seasonal Variation of Polycyclic Aromatic Hydrocarbon Exposure Levels in Mexico City, 548

Biodegradability Potential

Characterization of Compost-Like Outputs from Mechanical Biological Treatment of Municipal Solid Waste, 694

Biodegradation

Preliminary Acclimation Strategies for Successful Startup in Conventional Biofilters, 959

Biodiesel

Aerosols Emitted in Underground Mine Air by Diesel Engine Fueled with Biodiesel, 237

Biodiesel versus Diesel: A Pilot Study Comparing Exhaust Exposures for Employees at a Rural Municipal Facility, 1026

Biofiltration

Preliminary Acclimation Strategies for Successful Startup in Conventional Biofilters, 959

Biogenic Volatile Organic Compound

The Effect of Ozone on the Removal Effectiveness of Photocatalysis on Indoor Gaseous Biogenic Volatile Organic Compounds, 820

Biological Treatment

Characterization of Compost-Like Outputs from Mechanical Biological Treatment of Municipal Solid Waste, 694

The Potential Environmental Impact of Waste from Cellulosic Ethanol Production, 245

Biomass Burning

Fine Particulate Matter Source Apportionment Following a Large Woodstove Changeout Program in Libby, Montana, 688

Bioreactor Landfill

Evaluation of Landfill Gas Decay Constant for Municipal Solid Waste Landfills Operated as Bioreactors, 91

Biowastes

Characterization of Compost-Like Outputs from Mechanical Biological Treatment of Municipal Solid Waste, 694

Bisulfite Oxidation

Sulfite Oxidation Catalyzed by Cobalt Ions in Flue Gas Desulfurization Processes, 675

Black Carbon (BC)

Black and Organic Carbon Emission Inventories: Review and Application to California, 497

Filter Light Attenuation as a Surrogate for Elemental Carbon, 1365

Hourly Measurements of Fine Particulate Sulfate and Carbon Aerosols at the Harvard–U.S. Environmental Protection Agency Supersite in Boston, 1327

Spatiotemporal Variability of Light-Absorbing Carbon Concentration in a Residential Area Impacted by Woodsmoke, 356

Burning of Heavy Fuel Oil (HFO)

Electron Beam Technology for Multi-pollutant Emissions Control from Heavy Fuel Oil-Fired Boiler, 932

Calculation Methods

Developing a High-Resolution Vehicular Emission Inventory by Integrating an Emission Model and a Traffic Model: Part 2—A Case Study in Beijing, 1471

Harmonization of Uncertainties of X-Ray Fluorescence Data for $PM_{2.5}$ Air Filter Analysis, 184

California

Reactivity Scales as Comparative Tools for Chemical Mechanisms, 914

Carbon Dioxide (CO_2)

Assessment of Long-Term Gas Sampling Design at Two Commercial Manure-Belt Layer Barns, 702

Carbon Dioxide (CO_2) Removal

Carbon Dioxide Removal from Flue Gases by Absorption/Desorption in Aqueous Diethanolamine Solutions, 925

Carbon Dioxide Capture, and Storage (CCS)

Adsorption of Carbon Dioxide from Gas Streams via Mesoporous Spherical-Silica Particles, 489

Carbon Monoxide (CO)

Air Quality at Night Markets in Taiwan, 369

High-Resolution Mobile Monitoring of Carbon Monoxide and Ultrafine Particle Concentrations in a Near-Road Environment, 328

In Situ Experimental Study of Carbon Monoxide Generation by Gasoline-Powered Electric Generator in an Enclosed Space, 1443

Model for Estimation of Traffic Pollutant Levels in Northern Communities, 1335

Use of Passive Diffusion Tubes to Monitor Air Pollutants, 204

Carbon Monoxide Generation Rate

In Situ Experimental Study of Carbon Monoxide Generation by Gasoline-Powered Electric Generator in an Enclosed Space, 1443

Carcinogens

Influence of Traffic Emissions on the Carcinogenic Polycyclic Aromatic Hydrocarbons in Outdoor Breathable Particles, 393

Catalyst

Sulfite Oxidation Catalyzed by Cobalt Ions in Flue Gas Desulfurization Processes, 675

Catalytic Conversion

Novel Catalytic Process for Flue Gas Conditioning in Electrostatic Precipitators of Coal-Fired Power Plants, 1002

Cellulosic Ethanol

Potential Air Emission Impacts of Cellulosic Ethanol Production at Seven Demonstration Refineries in the United States, 1118

The Potential Environmental Impact of Waste from Cellulosic Ethanol Production, 245

Chance-Constrained Programming (CCP)

Fuzzy Robust Credibility-Constrained Programming for Environmental Management and Planning, 711

Characterization

Real-Time Identification of Indoor Pollutant Source Positions Based on Neural Network Locator of Contaminant Sources and Optimized Sensor Networks, 1034

Theoretical versus Observed Gas-Particle Partitioning of Carbonyl Emissions from Motor Vehicles, 1237

Chemical Mass Balance

Assessing the Impact of Industrial Source Emissions on Atmospheric Carbonaceous Aerosol Concentrations Using Routine Monitoring Networks, 149

Fine Particulate Matter Source Apportionment Following a Large Woodstove Changeout Program in Libby, Montana, 688

Chemical Speciation

Chemical Characterization and Preliminary Source Contribution of Fine Particulate Matter in the Mexicali/Imperial Valley Border Area, 258

Chemical Transport Modeling

Assessing Near-Field and Downwind Impacts of Reactivity-Based Substitutions, 316

Using Backup Generators for Meeting Peak Electricity Demand: A Sensitivity Analysis on Emission Controls, Location, and Health Endpoints, 523

Chile

Effect of Gas and Kerosene Space Heaters on Indoor Air Quality: A Study in Homes of Santiago, Chile, 98

Modification in the Soil and Traffic-Related Sources of Particle Matter between 1998 and 2007 in Santiago de Chile, 1410

China

Seasonal Pattern of the Acute Mortality Effects of Air Pollution, 481

Synergistic Mercury Removal by Conventional Pollutant Control Strategies for Coal-Fired Power Plants in China, 722

Chlorine Dioxide (ClO_2)

Adsorption of Chlorine Dioxide Gas on Activated Carbons, 898

Climate Change

Cost Analysis of Impacts of Climate Change on Regional Air Quality, 195

Greenhouse Gas Emissions from U.S. Institutions of Higher Education, 568

Long-Term Wind Speed Variations for Three Midwestern U.S. Cities, 1057

Cloud Point Extraction (CPE)

Removal of Polyphenols from Wine Sludge Using Cloud Point Extraction, 454

Coal Combustion

The Effect of Emission from Coal Combustion in Nonindustrial Sources on Deposition of Sulfur and Oxidized Nitrogen in Poland, 856

Coal-Fired Units

Natural Desulfurization in Coal-Fired Units Using Greek Lignite, 1269

Cobalt

Sulfite Oxidation Catalyzed by Cobalt Ions in Flue Gas Desulfurization Processes, 675

Colleges, and Universities

Greenhouse Gas Emissions from U.S. Institutions of Higher Education, 568

Combustion

Emission Characteristics of Granulated Fuel Produced from Sewage Sludge and Coal Slime, 1487

Mercury Speciation and Distribution in a 660-Megawatt Utility Boiler in Taiwan Firing Bituminous Coals, 514

Updating the Conceptual Model for Fine Particle Mass Emissions from Combustion Systems, 1204

Combustion Aerosol

Directions for Combustion Engine Aerosol Measurement in the 21st Century, 1165

Composite Board

The Recycling of Comminuted Glass-Fiber-Reinforced Resin from Electronic Waste, 532

Composition Fine Particulate Matter

Semicontinuous $PM_{2.5}$ and PM_{10} Mass and Composition Measurements in Lindon, Utah, during Winter 2007, 346

Continuous Emission Monitoring (CEM)

A Feasibility Study of a Predictive Emissions Monitoring System Applied to Taipower's Nanpu and Hsinta Power Plants, 907

Ammonia Emissions from a U.S. Broiler House—Comparison of Concurrent Measurements Using Three Different Technologies, 939

Control Strategies

Assessing Near-Field and Downwind Impacts of Reactivity-Based Substitutions, 316

Fugitive Dust Emission Source Profiles and Assessment of Selected Control Strategies for Particulate Matter at Gravel Processing Sites in Taiwan, 1262

Synergistic Mercury Removal by Conventional Pollutant Control Strategies for Coal-Fired Power Plants in China, 722

Uncertainty Analysis of Ozone Formation and Response to Emission Controls Using Higher-Order Sensitivities, 797

Cost Analysis

Cost Analysis of Impacts of Climate Change on Regional Air Quality, 195

Costs

An Assessment of Costs and Benefits Associated with Mercury Emission Reductions from Major Anthropogenic Sources, 302

Modeling Municipal Solid Waste Management System under Uncertainty, 439

Credibility

Fuzzy Robust Credibility-Constrained Programming for Environmental Management and Planning, 711

Critical Review

2010 Critical Review: Multipollutant Air Quality Management, 645

Assessment of Secondary Organic Carbon in the Southeastern United States: A Review, 1282

Environmental and Human Health Risks of Aerosolized Silver Nanoparticles, 770

Multipollutant Air Quality Management, 1154

Review of Recent Advances in Detection of Organic Markers in Fine Particulate Matter and Their Use for Source Apportionment, 3

Data Quality

Radial-Interval Linear Programming for Environmental Management under Varied Protection Levels, 1078

Decay Constant

Evaluation of Landfill Gas Decay Constant for Municipal Solid Waste Landfills Operated as Bioreactors, 91

Decision-Making

An Inexact Fuzzy-Chance-Constrained Air Quality Management Model, 805

Modeling Municipal Solid Waste Management System under Uncertainty, 439

Radial-Interval Linear Programming for Environmental Management under Varied Protection Levels, 1078

Desorption

Carbon Dioxide Removal from Flue Gases by Absorption/Desorption in Aqueous Diethanolamine Solutions, 925

Diesel Emissions

Alternatives to the Gravimetric Method for Quantification of Diesel Particulate Matter near the Lower Level of Detection, 1177

Diesel Exhaust

Can Real-World Diesel Exhaust Particle Size Distribution be Reproduced in the Laboratory? A Critical Review, 1245

Diesel Oxidation Catalyst

Aerosols Emitted in Underground Mine Air by Diesel Engine Fueled with Biodiesel, 237

Diesel Particulate Filter (DPF)

An Analysis of Field-Aged Diesel Particulate Filter Performance: Particle Emissions before, during, and after Regeneration, 968

Potential Ozone Impacts of Excess NO_2 Emissions from Diesel Particulate Filters for On- and Off-Road Diesel Engines, 977

Distributed Generation

Using Backup Generators for Meeting Peak Electricity Demand: A Sensitivity Analysis on Emission Controls, Location, and Health Endpoints, 523

Distribution

Stabilization of Residues Obtained from the Treatment of Laboratory Waste. Part 1—Treatment Path of Metals in a Plasma Melting System, 429

Dry Cleaning

Preliminary Study of Propyl Bromide Exposure among New Jersey Dry Cleaners as a Result of a Pending Ban on Perchloroethylene, 1049

Dual Porosity

Gas Dispersion and Immobile Gas Volume in Solid and Porous Particle Biofilter Materials at Low Air Flow Velocities, 830

Dynamometers

Methods of Characterizing the Distribution of Exhaust Emissions from Light-Duty, Gasoline-Powered Motor Vehicles in the U.S. Fleet, 1376

Efficiency Assessment

Fugitive Dust Emission Source Profiles and Assessment of Selected Control Strategies for Particulate Matter at Gravel Processing Sites in Taiwan, 1262

Electric Arc Furnace (EAF)

Levels of Polychlorinated Dibenzo-*p*-Dioxins, and Dibenzofurans (PCDD/Fs) and Trace Metals in the Blood of Nonoccupationally Exposed Residents Living in the Vicinity of a Municipal Solid Waste Incinerator and Electric Arc Furnace, 731

Electron Beam Treatment

Electron Beam Technology for Multipollutant Emissions Control from Heavy Fuel Oil-Fired Boiler, 932

Electronic Waste

The Recycling of Comminuted Glass-Fiber-Reinforced Resin from Electronic Waste, 532

Thermal Degradation Behavior of Waste Video Cards Using Thermogravimetric Analysis and Pyrolysis Gas Chromatography/Mass Spectrometry Techniques, 540

Electrostatic Precipitation

Novel Catalytic Process for Flue Gas Conditioning in Electrostatic Precipitators of Coal-Fired Power Plants, 1002

Elemental Carbon (EC)

Filter Light Attenuation as a Surrogate for Elemental Carbon, 1365

Hourly Measurements of Fine Particulate Sulfate and Carbon Aerosols at the Harvard–U.S. Environmental Protection Agency Supersite in Boston, 1327

Emission Control

Electron Beam Technology for Multipollutant Emissions Control from Heavy Fuel Oil-Fired Boiler, 932

Emission Controls: Wroclaw

The Effect of Emission from Coal Combustion in Nonindustrial Sources on Deposition of Sulfur and Oxidized Nitrogen in Poland, 856

Emission Factor

Fugitive Dust Emission Source Profiles and Assessment of Selected Control Strategies for Particulate Matter at Gravel Processing Sites in Taiwan, 1262

Emission Inventories

Developing a High-Resolution Vehicular Emission Inventory by Integrating an Emission Model and a Traffic Model: Part 2—A Case Study in Beijing, 1471

Greenhouse Gas Emissions from U.S. Institutions of Higher Education, 568

Improvements to Lawn and Garden Equipment Emissions Estimates for Baltimore, Maryland, 1452

Potential Ozone Impacts of Excess NO_2 Emissions from Diesel Particulate Filters for On- and Off-Road Diesel Engines, 977

The Potential of a Partial-Flow Constant Dilution Ratio Sampling System as a Candidate for Vehicle Exhaust Aerosol Measurements, 1223

Emission Inventory

Black and Organic Carbon Emission Inventories: Review and Application to California, 497

Emission Rates

Fugitive Dust Emission Source Profiles and Assessment of Selected Control Strategies for Particulate Matter at Gravel Processing Sites in Taiwan, 1262

The Potential of a Partial-Flow Constant Dilution Ratio Sampling System as a Candidate for Vehicle Exhaust Aerosol Measurements, 1223

Emissions

A Genetic-Algorithm-Aided Stochastic Optimization Model for Regional Air Quality Management under Uncertainty, 63

A Site-Specific Screening Comparison of Modeled and Monitored Air Dispersion and Deposition for Perfluorooctanoate, 402

A Statistical Model for Landfill Surface Emissions, 219

Effect of Fractionation and Pyrolysis on Fuel Properties of Poultry Litter, 875

Emission Characteristics of Granulated Fuel Produced from Sewage Sludge and Coal Slime, 1487

Impact of Oxidation Catalysts on Exhaust NO_2/NO_x Ratio from Lean-Burn Natural Gas Engines, 867

Marine Vessels as Substitutes for Heavy-Duty Trucks in Great Lakes Freight Transportation, 884

Regression-Based Oxides of Nitrogen Predictors for Three Diesel Engine Technologies, 72

Seasonal Odor, Ammonia, Hydrogen Sulfide, and Carbon Dioxide Concentrations and Emissions from Swine Grower-Finisher Rooms, 471

Updating the Conceptual Model for Fine Particle Mass Emissions from Combustion Systems, 1204

Emissions Characterization

Ammonia Emissions from a U.S. Broiler House—Comparison of Concurrent Measurements Using Three Different Technologies, 939

Assessing the Impact of Industrial Source Emissions on Atmospheric Carbonaceous Aerosol Concentrations Using Routine Monitoring Networks, 149

Developing a High-Resolution Vehicular Emission Inventory by Integrating an Emission Model and a Traffic Model: Part 1—Modeling Fuel Consumption and Emissions Based on Speed and Vehicle-Specific Power, 1463

Fine and Ultrafine Emission Dynamics from a Ferrous Foundry Cupola Furnace, 556

Low-Wind/High Particulate Matter Episodes in the Calexico/Mexicali Region, 1476

Potential Air Emission Impacts of Cellulosic Ethanol Production at Seven Demonstration Refineries in the United States, 1118

Emissions Controls

Impact of Oxidation Catalysts on Exhaust NO_2/NO_x Ratio from Lean-Burn Natural Gas Engines, 867

Emissions Reduction

Farm-Scale Evaluation of Ozonation for Mitigating Ammonia Concentrations in Broiler Houses, 789

Impact of Oxidation Catalysts on Exhaust NO_2/NO_x Ratio from Lean-Burn Natural Gas Engines, 867

Energy Consumption

Multicriteria Aided Design of Integrated Heating-Cooling Energy Systems in Buildings, 949

Energy Efficiency

Effect of Ethanol-Gasoline Blends on Small Engine Generator Energy Efficiency and Exhaust Emission, 142

Energy from Waste

Potential of Municipal Solid Waste for Renewable Energy Production and Reduction of Greenhouse Gas Emissions in South Korea, 176

Energy Systems

Multicriteria Aided Design of Integrated Heating-Cooling Energy Systems in Buildings, 949

Engine Exhaust

Directions for Combustion Engine Aerosol Measurement in the 21st Century, 1165

Environmental Justice

Spatial Variation in Ambient Air Toxics Concentrations and Health Risks between Industrial-Influenced, Urban, and Rural Sites, 271

Environmental Management

A Genetic-Algorithm-Aided Stochastic Optimization Model for Regional Air Quality Management under Uncertainty, 63

An Inexact Fuzzy-Chance-Constrained Air Quality Management Model, 805

Fuzzy Robust Credibility-Constrained Programming for Environmental Management and Planning, 711

Radial-Interval Linear Programming for Environmental Management under Varied Protection Levels, 1078

Environmental Protection

Greenhouse Gas Emission Mitigation Relevant to Changes in Municipal Solid Waste Management System, 782

Enzymes

The Potential Environmental Impact of Waste from Cellulosic Ethanol Production, 245

Epidemiology

A Comparison of Statistical Techniques for Combining Modeled and Observed Concentrations to Create High-Resolution Ozone Air Quality Surfaces, 586

A Two-Time-Period Comparison of the Effects of Ambient Air Pollution on Outpatient Visits for Acute Respiratory Illnesses, 163

Ethanol-Gasoline Blended Fuels

Effect of Ethanol-Gasoline Blends on Small Engine Generator Energy Efficiency and Exhaust Emission, 142

Evacuated Canisters

Evaluation of an Air Sampling Technique for Assessing Low-Level Volatile Organic Compounds in Indoor Environments, 156

Exhaust Dilution Process

Can Real-World Diesel Exhaust Particle Size Distribution be Reproduced in the Laboratory? A Critical Review, 1245

Exposure

Biodiesel versus Diesel: A Pilot Study Comparing Exhaust Exposures for Employees at a Rural Municipal Facility, 1026

Development of the Releasable Asbestos Field Sampler, 294

In-Vehicle Exposures to Particulate Matter and Black Carbon, 130

Use of Passive Diffusion Tubes to Monitor Air Pollutants, 204

Exposure Parameters

Aerosols Emitted in Underground Mine Air by Diesel Engine Fueled with Biodiesel, 237

Extraction

Reclamation of Elemental Sulfur from Flue Gas Biodesulfurization Waste Sludge, 603

Factor Analysis (FA)

Evolution of Vehicle Exhaust Particles in the Atmosphere, 1192

Modification in the Soil and Traffic-Related Sources of Particle Matter between 1998 and 2007 in Santiago de Chile, 1410

Feedstock

The Potential Environmental Impact of Waste from Cellulosic Ethanol Production, 245

Fine Particulate Matter ($PM_{2.5}$)

Model for Estimation of Traffic Pollutant Levels in Northern Communities, 1335

Flue Gas

Electron Beam Technology for Multipollutant Emissions Control from Heavy Fuel Oil-Fired Boiler, 932

Flue Gas Biodesulfurization (FGBD)

Reclamation of Elemental Sulfur from Flue Gas Biodesulfurization Waste Sludge, 603

Flue Gas Conditioning

Novel Catalytic Process for Flue Gas Conditioning in Electrostatic Precipitators of Coal-Fired Power Plants, 1002

Flue Gas Desulfurization (FGD)

Sulfite Oxidation Catalyzed by Cobalt Ions in Flue Gas Desulfurization Processes, 675

Synergistic Mercury Removal by Conventional Pollutant Control Strategies for Coal-Fired Power Plants in China, 722

Technical Description of Parameters Influencing the pH Value of Suspension Absorbent Used in Flue Gas Desulfurization Systems, 1009

Foam Coating

Preparation and Characterization of Porous Composite Filter Medium by Polytetrafluoroethylene Foam Coating, 137

Formaldehyde (HCHO)

Air Quality at Night Markets in Taiwan, 369

Freight

Marine Vessels as Substitutes for Heavy-Duty Trucks in Great Lakes Freight Transportation, 884

Fuel from Waste

Emission Characteristics of Granulated Fuel Produced from Sewage Sludge and Coal Slime, 1487

Fuels

Mercury Speciation and Distribution in a 660-Megawatt Utility Boiler in Taiwan Firing Bituminous Coals, 514

Potential Air Emission Impacts of Cellulosic Ethanol Production at Seven Demonstration Refineries in the United States, 1118

The Potential Environmental Impact of Waste from Cellulosic Ethanol Production, 245

Fugitive Dust

Fugitive Dust Emission Source Profiles and Assessment of Selected Control Strategies for Particulate Matter at Gravel Processing Sites in Taiwan, 1262

Full Cost Analysis

Using Backup Generators for Meeting Peak Electricity Demand: A Sensitivity Analysis on Emission Controls, Location, and Health Endpoints, 523

Fuzzy

Fuzzy Robust Credibility-Constrained Programming for Environmental Management and Planning, 711

Fuzzy-Chance-Constrained Programming (FCCP)

An Inexact Fuzzy-Chance-Constrained Air Quality Management Model, 805

Gas

Seasonal Odor, Ammonia, Hydrogen Sulfide, and Carbon Dioxide Concentrations and Emissions from Swine Grower-Finisher Rooms, 471

Gas Dispersion

Gas Dispersion and Immobile Gas Volume in Solid and Porous Particle Biofilter Materials at Low Air Flow Velocities, 830

Gas Flow Rate

Gas Dispersion and Immobile Gas Volume in Solid and Porous Particle Biofilter Materials at Low Air Flow Velocities, 830

Gas Turbine

A Feasibility Study of a Predictive Emissions Monitoring System Applied to Taipower's Nanpu and Hsinta Power Plants, 907

Gas-Liquid Mass Transfer

Sulfite Oxidation Catalyzed by Cobalt Ions in Flue Gas Desulfurization Processes, 675

Gases

Greenhouse Gas Emissions from U.S. Institutions of Higher Education, 568

Gasoline-Powered Generator

In Situ Experimental Study of Carbon Monoxide Generation by Gasoline-Powered Electric Generator in an Enclosed Space, 1443

Gaussian Dispersion Model

Spatiotemporal Variability of Light-Absorbing Carbon Concentration in a Residential Area Impacted by Woodsmoke, 356

Genapol X-080

Removal of Polyphenols from Wine Sludge Using Cloud Point Extraction, 454

Genetically Modified Organisms

The Potential Environmental Impact of Waste from Cellulosic Ethanol Production, 245

Genotoxic Effects

Mutagenicity of Airborne Particulates Assessed by *Salmonella* Assay and the SOS Chromotest in Wroclaw Poland, 993

Glass-Fiber-Reinforced Resin

The Recycling of Comminuted Glass-Fiber-Reinforced Resin from Electronic Waste, 532

Global Warming/Greenhouse Effect

Greenhouse Gas Emission Mitigation Relevant to Changes in Municipal Solid Waste Management System, 782

Potential Air Emission Impacts of Cellulosic Ethanol Production at Seven Demonstration Refineries in the United States, 1118

Gravel Processing Sites

Fugitive Dust Emission Source Profiles and Assessment of Selected Control Strategies for Particulate Matter at Gravel Processing Sites in Taiwan, 1262

Great Lakes

Marine Vessels as Substitutes for Heavy-Duty Trucks in Great Lakes Freight Transportation, 884

Green Cleaning

Preliminary Study of Propyl Bromide Exposure among New Jersey Dry Cleaners as a Result of a Pending Ban on Perchloroethylene, 1049

Greenhouse Gas (GHG)

Evaluation of Landfill Gas Decay Constant for Municipal Solid Waste Landfills Operated as Bioreactors, 91

Greenhouse Gas Emissions from U.S. Institutions of Higher Education, 568

Potential of Municipal Solid Waste for Renewable Energy Production and Reduction of Greenhouse Gas Emissions in South Korea, 176

Hazardous Air Pollutants (HAPs)

Copper Loaded on Sol-Gel-Derived Alumina Adsorbents for Phosphine Removal, 629

Fine and Ultrafine Emission Dynamics from a Ferrous Foundry Cupola Furnace, 556

Revisiting a Population-Dynamic Model of Air Pollution and Daily Mortality of the Elderly in Philadelphia, 611

Health Effects/Risks

A Two-Time-Period Comparison of the Effects of Ambient Air Pollution on Outpatient Visits for Acute Respiratory Illnesses, 163

Spatial Variation in Ambient Air Toxics Concentrations and Health Risks between Industrial-Influenced, Urban, and Rural Sites, 271

The Potential Environmental Impact of Waste from Cellulosic Ethanol Production, 245

Heaters

Effect of Gas and Kerosene Space Heaters on Indoor Air Quality: A Study in Homes of Santiago, Chile, 98

Heavy Metals

Toxicological Assessment of Coated versus Uncoated Rubber Granulates Obtained from Used Tires for Use in Sport Facilities, 741

Hot Gas Cleaning

Preparation and Characterization of Porous Composite Filter Medium by Polytetrafluoroethylene Foam Coating, 137

Hourly Measurement

Hourly Measurements of Fine Particulate Sulfate and Carbon Aerosols at the Harvard–U.S. Environmental Protection Agency Supersite in Boston, 1327

Human Blood

Levels of Polychlorinated Dibenzo-*p*-Dioxins, and Dibenzofurans (PCDD/Fs) and Trace Metals in the Blood of Nonoccupationally Exposed Residents Living in the Vicinity of a Municipal Solid Waste Incinerator and Electric Arc Furnace, 731

Human Exposure

A Comparison of Statistical Techniques for Combining Modeled and Observed Concentrations to Create High-Resolution Ozone Air Quality Surfaces, 586

Relationship between $PM_{2.5}$ Collected at Residential Outdoor Locations and a Central Site, 1094

Human Health

Using Backup Generators for Meeting Peak Electricity Demand: A Sensitivity Analysis on Emission Controls, Location, and Health Endpoints, 523

HVAC Systems

Real-Time Identification of Indoor Pollutant Source Positions Based on Neural Network Locator of Contaminant Sources and Optimized Sensor Networks, 1034

Immobile Pore Volume

Gas Dispersion and Immobile Gas Volume in Solid and Porous Particle Biofilter Materials at Low Air Flow Velocities, 830

IMPROVE Network

Evaluation of Regional-Scale Receptor Modeling, 26

Toward Effective Source Apportionment Using Positive Matrix Factorization: Experiments with Simulated $PM_{2.5}$ Data, 43

Incineration

Potential of Municipal Solid Waste for Renewable Energy Production and Reduction of Greenhouse Gas Emissions in South Korea, 176

Indoor

In Situ Experimental Study of Carbon Monoxide Generation by Gasoline-Powered Electric Generator in an Enclosed Space, 1443

Indoor Air

Evaluation of an Air Sampling Technique for Assessing Low-Level Volatile Organic Compounds in Indoor Environments, 156

Results of a Long-Term Study of Vapor Intrusion at Four Large Buildings at the NASA Ames Research Center, 747

Indoor Air Pollution

Effect of Gas and Kerosene Space Heaters on Indoor Air Quality: A Study in Homes of Santiago, Chile, 98

Farm-Scale Evaluation of Ozonation for Mitigating Ammonia Concentrations in Broiler Houses, 789

Performance Evaluation of an In Situ Nitrous Acid Measurement System and Continuous Measurement of Nitrous Acid in an Indoor Environment, 1434

The Effect of Ozone on the Removal Effectiveness of Photocatalysis on Indoor Gaseous Biogenic Volatile Organic Compounds, 820

Indoor Air Quality (IAQ)

Application of Nanoscale Silver-Doped Titanium Dioxide as Photocatalyst for Indoor Airborne Bacteria Control: A Feasibility Study in Medical Nursing Institutions, 337

Industrial Pollution

A Genetic-Algorithm-Aided Stochastic Optimization Model for Regional Air Quality Management under Uncertainty, 63

Fine and Ultrafine Emission Dynamics from a Ferrous Foundry Cupola Furnace, 556

Industrial Productivity

Characterization of Volatile Organic Compounds in the Vicinity of an Optoelectronics Industrial Park in Taiwan, 55

Inexact Optimization

Radial-Interval Linear Programming for Environmental Management under Varied Protection Levels, 1078

Ingot

Stabilization of Residues Obtained from the Treatment of Laboratory Waste. Part 1—Treatment Path of Metals in a Plasma Melting System, 429

Inoculum

Preliminary Acclimation Strategies for Successful Startup in Conventional Biofilters, 959

Integrated Heating-Cooling

Multicriteria Aided Design of Integrated Heating-Cooling Energy Systems in Buildings, 949

Intercomparison

Hourly Measurements of Fine Particulate Sulfate and Carbon Aerosols at the Harvard–U.S. Environmental Protection Agency Supersite in Boston, 1327

Interval Linear Programming (ILP)

An Inexact Fuzzy-Chance-Constrained Air Quality Management Model, 805

Kinetics

Combustion Kinetics and Emission Characteristics of Polycyclic Aromatic Hydrocarbons from Polylactic Acid Combustion, 849

Laboratory Waste (LW)

Stabilization of Residues Obtained from the Treatment of Laboratory Waste. Part 1—Treatment Path of Metals in a Plasma Melting System, 429

Landfill Emissions

Uncertainties Associated with the Use of Optical Remote Sensing Technique to Estimate Surface Emissions in Landfill Applications, 460

Landfill Gas

A Statistical Model for Landfill Surface Emissions, 219

Uncertainties Associated with the Use of Optical Remote Sensing Technique to Estimate Surface Emissions in Landfill Applications, 460

Landfills

A Statistical Model for Landfill Surface Emissions, 219

Characterization of Compost-Like Outputs from Mechanical Biological Treatment of Municipal Solid Waste, 694

Evaluation of Landfill Gas Decay Constant for Municipal Solid Waste Landfills Operated as Bioreactors, 91

Greenhouse Gas Emission Mitigation Relevant to Changes in Municipal Solid Waste Management System, 782

Potential of Municipal Solid Waste for Renewable Energy Production and Reduction of Greenhouse Gas Emissions in South Korea, 176

Large-Scale Composting

Odor Annoyance near Waste Treatment Centers: A Population-Based Study in Finland, 412

Liberation

Interfacial and Mechanical Property Analysis of Waste Printed Circuit Boards Subject to Thermal Shock, 229

Lidar

Study of the Properties of Aerosols and the Air Quality Index Using a Backscatter Lidar System and Aeronet Sunphotometer in the City of São Paulo, Brazil, 386

Light Attenuation

Filter Light Attenuation as a Surrogate for Elemental Carbon, 1365

Limestone

Technical Description of Parameters Influencing the pH Value of Suspension Absorbent Used in Flue Gas Desulfurization Systems, 1009

Low Concentration

Synthesis of Chromium-Doped Malayaite Pigments from Wastewater Containing Low Chromium(VI), 1257

Malayaite Pigment

Synthesis of Chromium-Doped Malayaite Pigments from Wastewater Containing Low Chromium(VI), 1257

Mass Balance

Mercury Speciation and Distribution in a 660-Megawatt Utility Boiler in Taiwan Firing Bituminous Coals, 514

Mass Spectral Data

Review of Recent Advances in Detection of Organic Markers in Fine Particulate Matter and Their Use for Source Apportionment, 3

Mass Transfer Coefficient

Experimental and Numerical Study on Effects of Airflow and Aqueous Ammonium Solution Temperature on Ammonia Mass Transfer Coefficient, 419

Mass Transfer Rate

Carbon Dioxide Removal from Flue Gases by Absorption/Desorption in Aqueous Diethanolamine Solutions, 925

Master Chemical Mechanism (MCMv3.1)

Reactivity Scales as Comparative Tools for Chemical Mechanisms, 914

Measurement

Assessment of Long-Term Gas Sampling Design at Two Commercial Manure-Belt Layer Barns, 702

Measurement Techniques

A Re-Examination of Ambient Air Ozone Monitor Interferences, 1353

Buoyancy-Corrected Gravimetric Analysis of Lightly Loaded Filters, 1065

Performance Evaluation of an In Situ Nitrous Acid Measurement System and Continuous Measurement of Nitrous Acid in an Indoor Environment, 1434

Mercury Control

An Assessment of Costs and Benefits Associated with Mercury Emission Reductions from Major Anthropogenic Sources, 302

Carbon Bed Mercury Emissions Control for Mixed Waste Treatment, 1341

Mercury Removal

Mercury Speciation and Distribution in a 660-Megawatt Utility Boiler in Taiwan Firing Bituminous Coals, 514

Synergistic Mercury Removal by Conventional Pollutant Control Strategies for Coal-Fired Power Plants in China, 722

Mesoporous Spherical-Silica Particles (MSPs)

Adsorption of Carbon Dioxide from Gas Streams via Mesoporous Spherical-Silica Particles, 489

Meteorological Conditions

Characterization of Volatile Organic Compounds in the Vicinity of an Optoelectronics Industrial Park in Taiwan, 55

Meteorology

Long-Term Wind Speed Variations for Three Midwestern U.S. Cities, 1057

Methane (CH_4)

A Statistical Model for Landfill Surface Emissions, 219

Characterization of Compost-Like Outputs from Mechanical Biological Treatment of Municipal Solid Waste, 694

Methane Emission

Evaluation of Landfill Gas Decay Constant for Municipal Solid Waste Landfills Operated as Bioreactors, 91

Mexico City

Seasonal Variation of Polycyclic Aromatic Hydrocarbon Exposure Levels in Mexico City, 548

Mexico-U.S. Border Area

Chemical Characterization and Preliminary Source Contribution of Fine Particulate Matter in the Mexicali/Imperial Valley Border Area, 258

Mixed Models

Relationship between $PM_{2.5}$ Collected at Residential Outdoor Locations and a Central Site, 1094

Mobile Laboratory

Evolution of Vehicle Exhaust Particles in the Atmosphere, 1192

Mobile Measurements

Road Dust Emissions from Paved Roads Measured Using Different Mobile Systems, 1422

Mobile Monitoring

High-Resolution Mobile Monitoring of Carbon Monoxide and Ultrafine Particle Concentrations in a Near-Road Environment, 328

Mobile Sources

Developing a High-Resolution Vehicular Emission Inventory by Integrating an Emission Model and a Traffic Model: Part 1—Modeling Fuel Consumption and Emissions Based on Speed and Vehicle-Specific Power, 1463

Developing a High-Resolution Vehicular Emission Inventory by Integrating an Emission Model and a Traffic Model: Part 2—A Case Study in Beijing, 1471

Improvements to Lawn and Garden Equipment Emissions Estimates for Baltimore, Maryland, 1452

Marine Vessels as Substitutes for Heavy-Duty Trucks in Great Lakes Freight Transportation, 884

Theoretical versus Observed Gas-Particle Partitioning of Carbonyl Emissions from Motor Vehicles, 1237

Model Evaluation

Toward Effective Source Apportionment Using Positive Matrix Factorization: Experiments with Simulated $PM_{2.5}$ Data, 43

Modeling

A Case Study of the Relative Effects of Power Plant Nitrogen Oxides and Sulfur Dioxide Emission Reductions on Atmospheric Nitrogen Deposition, 287

A Feasibility Study of a Predictive Emissions Monitoring System Applied to Taipower's Nanpu and Hsinta Power Plants, 907

A Site-Specific Screening Comparison of Modeled and Monitored Air Dispersion and Deposition for Perfluorooctanoate, 402

A Statistical Model for Landfill Surface Emissions, 219

Developing a High-Resolution Vehicular Emission Inventory by Integrating an Emission Model and a Traffic Model: Part 1—Modeling Fuel Consumption and Emissions Based on Speed and Vehicle-Specific Power, 1463

Evaluation of Relative Response Factor Methodology for Demonstrating Attainment of Ozone in Houston, Texas, 838

Modeling Municipal Solid Waste Management System under Uncertainty, 439

Potential Ozone Impacts of Excess NO_2 Emissions from Diesel Particulate Filters for On- and Off-Road Diesel Engines, 977

Real-Time Identification of Indoor Pollutant Source Positions Based on Neural Network Locator of Contaminant Sources and Optimized Sensor Networks, 1034

Regression-Based Oxides of Nitrogen Predictors for Three Diesel Engine Technologies, 72

The Influence of Model Resolution on Ozone in Industrial Volatile Organic Compound Plumes, 1105

Uncertainty Analysis of Ozone Formation and Response to Emission Controls Using Higher-Order Sensitivities, 797

Models

Experimental and Numerical Study on Effects of Airflow and Aqueous Ammonium Solution Temperature on Ammonia Mass Transfer Coefficient, 419

Seasonal Pattern of the Acute Mortality Effects of Air Pollution, 481

Moisture Effect

Adsorption of Carbon Dioxide from Gas Streams via Mesoporous Spherical-Silica Particles, 489

Monitoring

A Re-Examination of Ambient Air Ozone Monitor Interferences, 1353

A Statistical Model for Landfill Surface Emissions, 219

Performance Evaluation of an In Situ Nitrous Acid Measurement System and Continuous Measurement of Nitrous Acid in an Indoor Environment, 1434

Spatial Variation in Ambient Air Toxics Concentrations and Health Risks between Industrial-Influenced, Urban, and Rural Sites, 271

Monitoring Networks

Assessing the Impact of Industrial Source Emissions on Atmospheric Carbonaceous Aerosol Concentrations Using Routine Monitoring Networks, 149

Monte Carlo

Uncertainty Analysis of Ozone Formation and Response to Emission Controls Using Higher-Order Sensitivities, 797

Mortality

Seasonal Pattern of the Acute Mortality Effects of Air Pollution, 481

Motor Vehicles

Methods of Characterizing the Distribution of Exhaust Emissions from Light-Duty, Gasoline-Powered Motor Vehicles in the U.S. Fleet, 1376

Mounted Printed Circuit Board

Thermal Degradation Behavior of Waste Video Cards Using Thermogravimetric Analysis and Pyrolysis Gas Chromatography/Mass Spectrometry Techniques, 540

Muliticriteria Decision Aid

Multicriteria Aided Design of Integrated Heating-Cooling Energy Systems in Buildings, 949

Multipollutant

Electron Beam Technology for Multipollutant Emissions Control from Heavy Fuel Oil-Fired Boiler, 932

Multipollutant Air Quality Management

Multipollutant Air Quality Management, 1154

Multivariate Receptor Modeling

Evaluation of Regional-Scale Receptor Modeling, 26

Municipal Solid Waste

Modeling Municipal Solid Waste Management System under Uncertainty, 439

Potential of Municipal Solid Waste for Renewable Energy Production and Reduction of Greenhouse Gas Emissions in South Korea, 176

Radial-Interval Linear Programming for Environmental Management under Varied Protection Levels, 1078

Municipal Solid Waste Incinerator (MSWI)

Levels of Polychlorinated Dibenzo-*p*-Dioxins, and Dibenzofurans (PCDD/Fs) and Trace Metals in the Blood of Nonoccupationally Exposed Residents Living in the Vicinity of a Municipal Solid Waste Incinerator and Electric Arc Furnace, 731

n-Propyl Bromide (1-BP or 1-Bromopropane)

Preliminary Study of Propyl Bromide Exposure among New Jersey Dry Cleaners as a Result of a Pending Ban on Perchloroethylene, 1049

Nano-Ag/TiO_2

Application of Nanoscale Silver-Doped Titanium Dioxide as Photocatalyst for Indoor Airborne Bacteria Control: A Feasibility Study in Medical Nursing Institutions, 337

Nanoparticles

Buoyancy-Corrected Gravimetric Analysis of Lightly Loaded Filters, 1065

Environmental and Human Health Risks of Aerosolized Silver Nanoparticles, 770

Nanotechnology

Environmental and Human Health Risks of Aerosolized Silver Nanoparticles, 770

Natural Desulfurization

Natural Desulfurization in Coal-Fired Units Using Greek Lignite, 1269

Near-Road

High-Resolution Mobile Monitoring of Carbon Monoxide and Ultrafine Particle Concentrations in a Near-Road Environment, 328

Nitro-PAHs

Mutagenicity of Airborne Particulates Assessed by *Salmonella* Assay and the SOS Chromotest in Wroclaw Poland, 993

Nitrogen Deposition

A Case Study of the Relative Effects of Power Plant Nitrogen Oxides and Sulfur Dioxide Emission Reductions on Atmospheric Nitrogen Deposition, 287

Nitrogen Dioxide (NO_2)

Impact of Oxidation Catalysts on Exhaust NO_2/NO_x Ratio from Lean-Burn Natural Gas Engines, 867

Potential Ozone Impacts of Excess NO_2 Emissions from Diesel Particulate Filters for On- and Off-Road Diesel Engines, 977

Use of Passive Diffusion Tubes to Monitor Air Pollutants, 204

Nitrogen Oxides (NO_x)

A Case Study of the Relative Effects of Power Plant Nitrogen Oxides and Sulfur Dioxide Emission Reductions on Atmospheric Nitrogen Deposition, 287

A Feasibility Study of a Predictive Emissions Monitoring System Applied to Taipower's Nanpu and Hsinta Power Plants, 907

Impact of Oxidation Catalysts on Exhaust NO_2/NO_x Ratio from Lean-Burn Natural Gas Engines, 867

Nonindustrial Combustion

The Effect of Emission from Coal Combustion in Nonindustrial Sources on Deposition of Sulfur and Oxidized Nitrogen in Poland, 856

Nontraditional Sources

Assessing the Impact of Industrial Source Emissions on Atmospheric Carbonaceous Aerosol Concentrations Using Routine Monitoring Networks, 149

Nucleation

Can Real-World Diesel Exhaust Particle Size Distribution be Reproduced in the Laboratory? A Critical Review, 1245

Occupational Health

Biodiesel versus Diesel: A Pilot Study Comparing Exhaust Exposures for Employees at a Rural Municipal Facility, 1026

Odor

Seasonal Odor, Ammonia, Hydrogen Sulfide, and Carbon Dioxide Concentrations and Emissions from Swine Grower-Finisher Rooms, 471

Odor Annoyance

Odor Annoyance near Waste Treatment Centers: A Population-Based Study in Finland, 412

On-Board Emissions Measurements

Methods of Characterizing the Distribution of Exhaust Emissions from Light-Duty, Gasoline-Powered Motor Vehicles in the U.S. Fleet, 1376

Optical Remote Sensing (ORS)

Uncertainties Associated with the Use of Optical Remote Sensing Technique to Estimate Surface Emissions in Landfill Applications, 460

Organic Carbon (OC)

Assessment of Secondary Organic Carbon in the Southeastern United States: A Review, 1282

Black and Organic Carbon Emission Inventories: Review and Application to California, 497

Hourly Measurements of Fine Particulate Sulfate and Carbon Aerosols at the Harvard–U.S. Environmental Protection Agency Supersite in Boston, 1327

Organic Marker Compounds

Review of Recent Advances in Detection of Organic Markers in Fine Particulate Matter and Their Use for Source Apportionment, 3

Other Test Method-10 (OTM-10)

Uncertainties Associated with the Use of Optical Remote Sensing Technique to Estimate Surface Emissions in Landfill Applications, 460

Oxides of Nitrogen (NO_x)

Regression-Based Oxides of Nitrogen Predictors for Three Diesel Engine Technologies, 72

Oxygen Consumption Rate

In Situ Experimental Study of Carbon Monoxide Generation by Gasoline-Powered Electric Generator in an Enclosed Space, 1443

Ozonation

Farm-Scale Evaluation of Ozonation for Mitigating Ammonia Concentrations in Broiler Houses, 789

Ozone (O_3)

A Comparison of Statistical Techniques for Combining Modeled and Observed Concentrations to Create High-Resolution Ozone Air Quality Surfaces, 586

A Re-Examination of Ambient Air Ozone Monitor Interferences, 1353

Evaluation of Relative Response Factor Methodology for Demonstrating Attainment of Ozone in Houston, Texas, 838

Farm-Scale Evaluation of Ozonation for Mitigating Ammonia Concentrations in Broiler Houses, 789

Improvements to Lawn and Garden Equipment Emissions Estimates for Baltimore, Maryland, 1452

Reactivity Scales as Comparative Tools for Chemical Mechanisms, 914

The Effect of Ozone on the Removal Effectiveness of Photocatalysis on Indoor Gaseous Biogenic Volatile Organic Compounds, 820

The Influence of Model Resolution on Ozone in Industrial Volatile Organic Compound Plumes, 1105

Ozone Formation

Potential Ozone Impacts of Excess NO_2 Emissions from Diesel Particulate Filters for On- and Off-Road Diesel Engines, 977

Uncertainty Analysis of Ozone Formation and Response to Emission Controls Using Higher-Order Sensitivities, 797

Particle Charging

Alternatives to the Gravimetric Method for Quantification of Diesel Particulate Matter near the Lower Level of Detection, 1177

Particle Emissions

An Analysis of Field-Aged Diesel Particulate Filter Performance: Particle Emissions before, during, and after Regeneration, 968

Particle Measurement

Directions for Combustion Engine Aerosol Measurement in the 21st Century, 1165

Particle Morphology

Alternatives to the Gravimetric Method for Quantification of Diesel Particulate Matter near the Lower Level of Detection, 1177

Particle Size

Gas Dispersion and Immobile Gas Volume in Solid and Porous Particle Biofilter Materials at Low Air Flow Velocities, 830

Particle Soot Absorption Photometer (PSAP)

Spatiotemporal Variability of Light-Absorbing Carbon Concentration in a Residential Area Impacted by Woodsmoke, 356

Particulate Matter (PM)

Aerosols Emitted in Underground Mine Air by Diesel Engine Fueled with Biodiesel, 237

Biodiesel versus Diesel: A Pilot Study Comparing Exhaust Exposures for Employees at a Rural Municipal Facility, 1026

Buoyancy-Corrected Gravimetric Analysis of Lightly Loaded Filters, 1065

Directions for Combustion Engine Aerosol Measurement in the 21st Century, 1165

Fine Particulate Matter Source Apportionment Following a Large Woodstove Changeout Program in Libby, Montana, 688

Fugitive Dust Emission Source Profiles and Assessment of Selected Control Strategies for Particulate Matter at Gravel Processing Sites in Taiwan, 1262

Harmonization of Uncertainties of X-Ray Fluorescence Data for $PM_{2.5}$ Air Filter Analysis, 184

Hourly Measurements of Fine Particulate Sulfate and Carbon Aerosols at the Harvard–U.S. Environmental Protection Agency Supersite in Boston, 1327

Low-Wind/High Particulate Matter Episodes in the Calexico/Mexicali Region, 1476

Methods of Characterizing the Distribution of Exhaust Emissions from Light-Duty, Gasoline-Powered Motor Vehicles in the U.S. Fleet, 1376

Modification in the Soil and Traffic-Related Sources of Particle Matter between 1998 and 2007 in Santiago de Chile, 1410

Novel Catalytic Process for Flue Gas Conditioning in Electrostatic Precipitators of Coal-Fired Power Plants, 1002

Fugitive Dust Emission Source Profiles and Assessment of Selected Control Strategies for Particulate Matter at Gravel Processing Sites in Taiwan, 1262

Southeastern United States

Assessment of Secondary Organic Carbon in the Southeastern United States: A Review, 1282

State-Space Model

Model for Estimation of Traffic Pollutant Levels in Northern Communities, 1335

Stationary Sources

Ammonia Emissions from a U.S. Broiler House—Comparison of Concurrent Measurements Using Three Different Technologies, 939

Sulfate (SO_4)

Hourly Measurements of Fine Particulate Sulfate and Carbon Aerosols at the Harvard–U.S. Environmental Protection Agency Supersite in Boston, 1327

Sulfur

Reclamation of Elemental Sulfur from Flue Gas Biodesulfurization Waste Sludge, 603

Sulfur Dioxide (SO_2)

A Case Study of the Relative Effects of Power Plant Nitrogen Oxides and Sulfur Dioxide Emission Reductions on Atmospheric Nitrogen Deposition, 287

A Genetic-Algorithm-Aided Stochastic Optimization Model for Regional Air Quality Management under Uncertainty, 63

Sulfur Trioxide (SO_3)

Novel Catalytic Process for Flue Gas Conditioning in Electrostatic Precipitators of Coal-Fired Power Plants, 1002

Surface Filtration

Preparation and Characterization of Porous Composite Filter Medium by Polytetrafluoroethylene Foam Coating, 137

Surface Modification

Adsorption of Carbon Dioxide from Gas Streams via Mesoporous Spherical-Silica Particles, 489

Suspended $PM_{2.5}$

Mutagenicity of Airborne Particulates Assessed by *Salmonella* Assay and the SOS Chromotest in Wroclaw Poland, 993

Tailpipe Emissions

Methods of Characterizing the Distribution of Exhaust Emissions from Light-Duty, Gasoline-Powered Motor Vehicles in the U.S. Fleet, 1376

Technical Paper

A Retrospective Comparison of Model-Based Forecasted $PM_{2.5}$ Concentrations with Measurements, 1293

Air Pollution Modeling at Road Sides Using the Operational Street Pollution Model—A Case Study in Hanoi, Vietnam, 1315

Chemical Characterization and Source Identification of Polycyclic Aromatic Hydrocarbons in Aerosols Originating from Different Sources, 1309

Contribution of Primary and Secondary Sources to Organic Aerosol and $PM_{2.5}$ at Search Networks Sites, 1388

Technology Development

Buoyancy-Corrected Gravimetric Analysis of Lightly Loaded Filters, 1065

Teflon

Preparation and Characterization of Porous Composite Filter Medium by Polytetrafluoroethylene Foam Coating, 137

Temperature

Experimental and Numerical Study on Effects of Airflow and Aqueous Ammonium Solution Temperature on Ammonia Mass Transfer Coefficient, 419

Thermal Degradation

Thermal Degradation Behavior of Waste Video Cards Using Thermogravimetric Analysis and Pyrolysis Gas Chromatography/Mass Spectrometry Techniques, 540

Thermal Shock

Interfacial and Mechanical Property Analysis of Waste Printed Circuit Boards Subject to Thermal Shock, 229

Thermal Treatment

Emission Characteristics of Granulated Fuel Produced from Sewage Sludge and Coal Slime, 1487

Potential of Municipal Solid Waste for Renewable Energy Production and Reduction of Greenhouse Gas Emissions in South Korea, 176

Thermogravimetry (TG)-Mass Spectroscopy (MS)

Combustion Kinetics and Emission Characteristics of Polycyclic Aromatic Hydrocarbons from Polylactic Acid Combustion, 849

Tire Crumb

Toxicological Assessment of Coated versus Uncoated Rubber Granulates Obtained from Used Tires for Use in Sport Facilities, 741

Tire Wear

Road Dust Emissions from Paved Roads Measured Using Different Mobile Systems, 1422

Toluene

Preliminary Acclimation Strategies for Successful Startup in Conventional Biofilters, 959

Toxicity Assessment

Toxicological Assessment of Coated versus Uncoated Rubber Granulates Obtained from Used Tires for Use in Sport Facilities, 741

Toxicity Equivalency Factors (TEFs)

Seasonal Variation of Polycyclic Aromatic Hydrocarbon Exposure Levels in Mexico City, 548

Trace Metal

Levels of Polychlorinated Dibenzo-*p*-Dioxins, and Dibenzofurans (PCDD/Fs) and Trace Metals in the Blood of Nonoccupationally Exposed Residents Living in the Vicinity of a Municipal Solid Waste Incinerator and Electric Arc Furnace, 731

Tracers

Real-Time Identification of Indoor Pollutant Source Positions Based on Neural Network Locator of Contaminant Sources and Optimized Sensor Networks, 1034

Traffic

Characterization of Volatile Organic Compounds in the Vicinity of an Optoelectronics Industrial Park in Taiwan, 55

Developing a High-Resolution Vehicular Emission Inventory by Integrating an Emission Model and a Traffic Model: Part 1—Modeling Fuel Consumption and Emissions Based on Speed and Vehicle-Specific Power, 1463

Developing a High-Resolution Vehicular Emission Inventory by Integrating an Emission Model and a Traffic Model: Part 2—A Case Study in Beijing, 1471

High-Resolution Mobile Monitoring of Carbon Monoxide and Ultrafine Particle Concentrations in a Near-Road Environment, 328

In-Vehicle Exposures to Particulate Matter and Black Carbon, 130

Influence of Traffic Emissions on the Carcinogenic Polycyclic Aromatic Hydrocarbons in Outdoor Breathable Particles, 393

Model for Estimation of Traffic Pollutant Levels in Northern Communities, 1335

Tropospheric Ozone

Long-Term Wind Speed Variations for Three Midwestern U.S. Cities, 1057

Turbulence Kinetic Energy

Relationship between $PM_{2.5}$ Collected at Residential Outdoor Locations and a Central Site, 1094

Ultrafine Particles

Effect of Gas and Kerosene Space Heaters on Indoor Air Quality: A Study in Homes of Santiago, Chile, 98

High-Resolution Mobile Monitoring of Carbon Monoxide and Ultrafine Particle Concentrations in a Near-Road Environment, 328

Uncertainty

An Inexact Fuzzy-Chance-Constrained Air Quality Management Model, 805

Harmonization of Uncertainties of X-Ray Fluorescence Data for $PM_{2.5}$ Air Filter Analysis, 184

Uncertainties Associated with the Use of Optical Remote Sensing Technique to Estimate Surface Emissions in Landfill Applications, 460

Uncertainty Analysis

Uncertainty Analysis of Ozone Formation and Response to Emission Controls Using Higher-Order Sensitivities, 797

Underground Mining

Aerosols Emitted in Underground Mine Air by Diesel Engine Fueled with Biodiesel, 237

Vapor Intrusion

Results of a Long-Term Study of Vapor Intrusion at Four Large Buildings at the NASA Ames Research Center, 747

Vapors

Results of a Long-Term Study of Vapor Intrusion at Four Large Buildings at the NASA Ames Research Center, 747

Vehicle Exhaust Particulate Matter (PM)

Evolution of Vehicle Exhaust Particles in the Atmosphere, 1192

Velocity

Experimental and Numerical Study on Effects of Airflow and Aqueous Ammonium Solution Temperature on Ammonia Mass Transfer Coefficient, 419

Video Card

Thermal Degradation Behavior of Waste Video Cards Using Thermogravimetric Analysis and Pyrolysis Gas Chromatography/Mass Spectrometry Techniques, 540

Vitrification

Stabilization of Residues Obtained from the Treatment of Laboratory Waste. Part 1—Treatment Path of Metals in a Plasma Melting System, 429

Volatile Organic Compound (VOC) Sampling

Evaluation of an Air Sampling Technique for Assessing Low-Level Volatile Organic Compounds in Indoor Environments, 156

Volatile Organic Compounds (VOCs)

Assessing Near-Field and Downwind Impacts of Reactivity-Based Substitutions, 316

Characterization of Volatile Organic Compounds in the Vicinity of an Optoelectronics Industrial Park in Taiwan, 55

Improvements to Lawn and Garden Equipment Emissions Estimates for Baltimore, Maryland, 1452

Results of a Long-Term Study of Vapor Intrusion at Four Large Buildings at the NASA Ames Research Center, 747

Waste Management

Fuzzy Robust Credibility-Constrained Programming for Environmental Management and Planning, 711

Greenhouse Gas Emission Mitigation Relevant to Changes in Municipal Solid Waste Management System, 782

Modeling Municipal Solid Waste Management System under Uncertainty, 439

Radial-Interval Linear Programming for Environmental Management under Varied Protection Levels, 1078

Waste Sludge

Reclamation of Elemental Sulfur from Flue Gas Biodesulfurization Waste Sludge, 603

Waste Treatment

Effect of Fractionation and Pyrolysis on Fuel Properties of Poultry Litter, 875

Effect of Fractionation and Pyrolysis on Fuel Properties of Poultry Litter, 875

Odor Annoyance near Waste Treatment Centers: A Population-Based Study in Finland, 412

Wastewater

Synthesis of Chromium-Doped Malayaite Pigments from Wastewater Containing Low Chromium(VI), 1257

Wine Sludge

Removal of Polyphenols from Wine Sludge Using Cloud Point Extraction, 454

Wood Burning

Fine Particulate Matter Source Apportionment Following a Large Woodstove Changeout Program in Libby, Montana, 688

Woodsmoke

Fine Particulate Matter Source Apportionment Following a Large Woodstove Changeout Program in Libby, Montana, 688

Wroclaw 09

Carbon Dioxide Removal from Flue Gases by Absorption/Desorption in Aqueous Diethanolamine Solutions, 925

Greenhouse Gas Emission Mitigation Relevant to Changes in Municipal Solid Waste Management System, 782

X-Ray Fluorescence (XRF)

Harmonization of Uncertainties of X-Ray Fluorescence Data for $PM_{2.5}$ Air Filter Analysis, 184
